

Suffolk Family History Society offers a warm welcome to both newcomers and experienced researchers. We have over 1,500 members including many from countries across the world

Six active Groups meet on a monthly basis in Bury St. Edmunds, Ipswich, Haverhill, Lowestoft, Sudbury and also at Hillingdon, Uxbridge in the West of London.

Suffolk Roots, our society journal, is a quarterly publication that comprises interesting articles by experts and members including advice on how to find and use data sources; news of the wider genealogy world; discoveries by our members in the course of their research and articles that address a different theme for each issue.

You can find us on the Internet at <http://www.suffolkfhs.org.uk> here there is also find a link to our Facebook page.

Volunteer groups of experienced society members have, for many years been transcribing and indexing parish registers from all over Suffolk.

Members wishing to take part in this interesting project are always welcome and working at branches of Suffolk Record Office on original documents that are hundreds of years old can be extremely rewarding.

We publish the data on CDs which may be purchased from the society (via the website) or at any of the many Family History Fairs that we attend every year.

Membership Application forms are also available for download from our website where you can find news of the Groups' activities and much more valuable information - including back issues of our *Suffolk Roots* journal to 1975.

MY FAMILY TREE

Starter Chart

Reg.Charity No. 1087748 : Company Reg. No.4191740

This is the family tree of

.....

Note down the information you find about your family members: the name, date of birth, marriage, death or other event and the place where it occurred.

Most Important: Record where you found the information so that it can easily be found again.

Do Remember: Completed trees found on Internet sites often contain errors - always build yours by referring to original sources.
